

Energy Management Policy

Bangalore Metro Rail Corporation Limited is committed to implement Energy Management Policy as apart of overall energy strategy. Our Policy entails a systematic approach to energy management planning and to achieve continued performance for improvement.

We shall strive to optimize energy consumption by

- ❖ Observing the laws of all central and state rules and regulations relevant to Energy Management System.
- ❖ Optimizing and improving Energy Management Plan through continual learning and adapting to changes in the environment while ensuring good governance.
- ❖ Reduce the emission of greenhouse gases.
- ❖ Creating awareness among our employees who are competent, collaborative to reduce energy wastage, through continuous application and training.
- ❖ Adopting suitable technology and processes for optimal energy conservation and track the energy usage by periodical energy auditing to achieve the Bench Mark.
- ❖ Implementing latest technologies like Renewable Energy Resources, Solar Energy for energy conservation and committed towards maximizing the energy efficiency across all our operations.

We regularly monitor our energy usage across our transport network and endeavor to optimize effective implementation of Energy Management Plan.
