Jayadeva Interchange Metro Station.

The present busy Jayadeva Junction is being remodelled to accommodate additional elevated Road and the interchange metro station of Reach 5 line from RV Road to Bommasandra, and the Reach 6 Line from Gottigere to Nagawara. This remodelling is one of its kind in the city of Bangalore and is an engineering marvel. This engineering feat has its own challenges to construct six levels of different infrastructure requirement.

An Animated 3D view of the Junction is shown below for depiction.

Art in Transit is a collaboration between Srishti Institute of Art, Design and technology and BMRCL.

Towering over you on Church Street is InkbrushNme’s Mural (Harshvardhan Kadam) three-storey mural for the MG Road Metro Station, facing Church Street Station. A story of five kids played out on a massive scale.

"Yes people come and go in a hurry but I hope people will stop and look at the work because it is a timeless story of five characters that everybody will relate to. People come here to have fun, eat well and celebrate. The work is going to reflect that energy. I want to have a ripple effect of the emotions portrayed in the art work” explains the artist.

Impact: One of the most photographed places in Bangalore
Operational High Lights January 2019:

Operational efficiency achieved in the month : 99.84%
Highest passenger in a day during the month : 4,34,109 on 07/01/2019
Highest revenue in a day during the month : 1,20,56,860 on 25/01/2109

Know Namma Metro Smart Card

Smart card is ticket medium that has a stored value for performing multiple journeys in Namma Metro. Cost of the card is Rs 50 which is an one time investment. Whenever the commuter uses the smart card for entry and an exit at Namma Metro stations the stored value gets reduced to the extent of journey performed which is 15% lesser than the token value for the distance travelled.

The Stored Value in a Smart Card can be recharged in the multiples in Rs 50 to the maximum of Rs 3000/-. The stored amount has the validity of 1 year from the date of recharge amount written on the card. However, validity can be extended on payment of Rs 20/-. The Smart Card can be recharged at TOM offices at Metro Station, through Cash or Credit or Debit Cards. Also can be recharged through BMRCL web top-up, Karnataka Mobile One Application & Internet Banking (Presently ICICI Bank only)

The recharge is reflected immediately on the Smart Card when done at TOM offices. The recharge amount will be credited to the Smart Card after 1 hour on presenting the Smart Card at the Automatic Entry Gate of any of the Metro station and can hold at the gates for writing on the card for maximum period of 60 days. After 60 days the recharge value to the card lapses, if not written.

Procedure for Correcting Entry-Exit Mismatch of Smart Cards:

Mismatch at Entry: This error comes at entry, when the commuter has not entered the Automatic Gates even after presenting the Smart Card for entry. (using the Smart Card for more than one time at entry). Customer care centre shall ensure for no fraudulent entry, adjust the Smart Card penalty to ZERO and allow the commuter to enter paid area.

When a commuter goes out of the system/paid area without exit recorded on their Smart Card the Automatic Gates will deny entry. The previous transactions of the Smart Card will be checked by the Customer care centre and the exit station shall be confirmed by the commuter. Customer care centre will collect the travel fare and after collecting travel fare, allow entry to the commuter through automatic gates.

Mismatch at Exit: This error comes at exit, when the smart card presented by the commuter at the Exit Gate does not have a proper entry recorded. The previous transactions of the Smart Card shall be checked by the Customer care centre and entry station shall be confirmed by the commuter. Customer care centre will write the said entry station into smart card and allow exit to the commuter through automatic gates.
